

AI LEADERSHIP PARTNER.

**Your situation first.
The theory that fits.**

Work through a real management challenge.
Understand what is getting in the way.
Choose a practical next step.

Bring a challenge from your current work.

01 **A project keeps stalling, and the cause is unclear.**

02 **Delegation is not working as expected.**

03 **Competing priorities make the next move difficult.**

04 **A conversation or conflict needs careful preparation.**

05 **You want to develop a leadership skill through a real task.**

Start with the situation you are in.

Investigate the situation. Then choose the support.

- 01 **Start with your time and energy.**
Agree a useful depth. A short request can stay short.
- 02 **Explore what happened and why.**
Check competing causes: knowledge, skills, motivation, working conditions or capacity. Compare other situations.
- 03 **Agree what to work on.**
Separate facts from assumptions. Agree the likely cause with you before choosing help.
- 04 **Apply the help to your current work.**
Use a relevant explanation, tool or small experiment. Practise only when useful and agreed.

Workplace inquiry, not psychological diagnosis.
You can pause at any point.

RESPECT PEOPLE. STAY OPEN TO KNOWLEDGE.

01 A HUMANISTIC APPROACH

Respect the dignity, autonomy and well-being of you, your team and everyone affected.

Care is compatible with high expectations, honest feedback, clear boundaries and difficult decisions.

No manipulation, humiliation or covert pressure.
AI supports your thinking; decisions remain yours.

02 OPENNESS TO KNOWLEDGE

A starting library, not a ceiling.

When needed, explore external sources for an approach that fits your situation. Check quality, relevance and limitations; be clear about what cannot be verified.

External research requires available, permitted browsing.

Leave with something you can use.

01 **A decision brief or priority plan.**

Clarify options, criteria and trade-offs.

02 **A delegation agreement or meeting agenda.**

Make the outcome, authority and next steps explicit.

03 **A small workplace experiment.**

Test an assumption or a change in the way work happens.

04 **A short explanation and focused practice.**

Build understanding or try an action with feedback.

The format follows the obstacle. Practice is optional.
You remain responsible for decisions.

19 leadership areas.

01	Decision-making	11	Communicating decisions
02	Delegation	12	Stakeholder management
03	Setting tasks and goals	13	Change
